Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 14-24 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over MATHIS et al. (6,129,755).

As to claims 14-22, and 24, MATHIS (Fig. 2; column 8, lines 45-54) discloses an intra-vascular self-expanding nitinol stent 50 for a human being restrained by sheath 40 for easy deployment. Nitinol stent 50 comprises from 50.5%-60% Ni and balance of titanium and the austenite finish temperature A_f of about 24-37 degree C (column 8, lines 45-54). Notice that stent 50 and sheath/constraint 40 comprise every structural limitation as recited in the claims and because the composition of stent 50 is in the range of the composition of the stent as claimed in the present invention, stent 50 must have martensite deformation temperature about 50 degrees C higher than A_f as recited in claim 23 of the present invention.

Art Unit: 3731

Alternatively, it would have been obvious to one of ordinary skill in the art to select the exact composition of Ni and Ti within the range of 50.5%-60% Ni and the balance of Ti so as to comprise every feature as recited in the claims.

Response to Amendment

The amendment filed on June 11, 2003 (entered 6/25/2003 as paper #12) under 37 CFR 1.131 has been considered but is ineffective to overcome the MATHIS et al. reference (US Pat. 6,129,755) reference.

The present invention claims a stent of shape memory alloy (Ni-Ti stent). MATHIS Ni-Ti shape memory alloy stent comprises substantially all structural limitations of the stent in the present invention as indicated above. MATHIS does not teach a process of deforming the Ni-Ti shape memory stent at or above Md temperature. However, because a product claim is mainly defined by all of the structural limitations listed in the claim and the MATHIS stent comprises substantially all structural limitations of the stent as claimed in the present invention, the claims of the present invention are unpatentable over MATHIS stent. Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3731

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
